

Mouse and trackpad practice

Three moves every computer user needs, practised with big playing cards.

Go to vsolitaire.com/en/practice/mouse-skills and try each move three times. It is free, with no signup and no ads. Take your time: nothing is timed.

1 Click

Press the left mouse button once and let go.

Try it: click the card to turn it over.

2 Double-click

Two quick clicks, without moving the mouse.

Try it: double-click the ace to send it up.

3 Drag

Press and hold, move, then let go.

Try it: put the red card on the black card.

On a trackpad

A click is a press (or tap) on the pad. To drag, press and hold the pad with one finger and slide with another finger.

No mouse? Use the keyboard

Press Tab to move from card to card, then Enter to play the card you are on. Ctrl+Z undoes a move (⌘+Z on a Mac).

Then play a real game

Press **Play a real game** after the exercises. In the toolbar above the cards, choose **1** for Draw 1, the gentler version.

Made a mistake? Press **Undo** to take back your last move, as often as you need.
